

POWER BREAKERS

#22045

ABOUT US

- Established in 2022 as a Rookie Team, we're powering ahead towards a bright future.
- We are a community-based team, driven by passionate middle and high schoolers.
- Our core strengths - creativity, technical prowess, and unwavering team and community spirit.

OUTREACH

- Led a robotics program at a university branch library, inspiring ~400 students
- Hosted a robot playground at a CCFFN event, engaging 350+ K-7 kids
- Welcomed 3 new team members and 3 observers through outreach efforts
- Ran Robotics/Coding clubs inspiring ~30, ~75, and ~40 elementary and middle school students
- Inspired 1000+ kids at community events including a gala and Holi celebration, Community nights and festivals
- Guided FLL teams toward FTC and mentored FTC teams -Terminal Velocity #27202 & Novatard #24950 from morrocco
- Participated in STEM nights and festivals reaching 500+ students and volunteers
- Continued school visits that grew into weekly sessions and helped launch a new robotics club

FTC

CONNECTIONS

- Worked with 4 International teams
- Met with the World Championship Finalist team Eureka #20871
- Mentored 4 Teams
 - FTC teams - 24950, 32737, 32491 & 27202
- Assisted/helped 5 separate teams
 - FTC teams - 10055, 17980, 14259, 9791 & 25742
- Collaborated with 8 teams
 - FTC teams - 20790, 10354, 20871, 31418, 12926, 12456, 13822, 25808,

INDUSTRY

CONNECTS

- Met with 7 Industry connects
 - Ashe Menon - CEO & Founder of Auredia AI & Harvard graduate, Wilbert Go - Google, Urvish Vashi - CFO at HighRun, Beena H - Amazon, Naveen Bachu - Caterpillar, Pradhyuns uncles,
- Got funding from 2 connects
 - After learning from Ashe and teaching him about first, his company graciously sponsored us.
 - Wilbert Go helped us start a fundraising campaign in google, giving us the ability to secure funds.

MAJOR

INITIATIVE

Cornerstone Robotics club

- Weekly mentoring of 30 kids since September
- Taught the engineering design process, building and programming

OnShape tutorials

- Multi-part OnShape series teaching CAD for FTC
- Hundreds of views

Open-Source CAD

- All robot CAD's from this year are open source and public on OnShape

Honor Roll Robotics team

- Visited The Honor Roll school and met with over 300 students, and helped them to start their own robotics team!

SPENDING

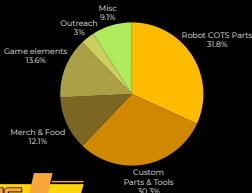

BUDGETING WAS ESSENTIAL FOR PURCHASING NEW PARTS AND PREVENTING FINANCIAL WASTE. BY CREATING TIMELY CHARTS, WE ENSURED THAT ALL COSTS WERE ACCOUNTED FOR.

OUR SPENDING MOSTLY WENT INTO OUR ROBOT, BUT OTHER COSTS ROSE AS WELL, WE DECIDED TO SEPARATE OUR CORE EXPENSES IN THROUGH DATA THAT COULD EASILY BE VIEWED.

Spending for Each Robot

	Robot Version 1	Robot Version 2
Robot Parts v1	\$1600	\$2,400
Robot Parts v2	\$750	\$1,650
Robot Parts v3	\$1,300	\$350
Filament (v1,2,3)	\$30	\$320
